Located at:- Nashville, TN

*Senior Software Engineer with 7+ years of experience in architecting scalable cloud infrastructure and **Generative AI orchestration**. Expertise in architecting **secure, scalable, and cost-effective cloud infrastructure** at OCI and AWS, with a strong focus on **Kubernetes (AKS) platform capabilities and Infrastructure as Code (Terraform)**. Proven track record in Python, Java, and DevOps (Kubernetes, CI/CD), with a focus on improving system resilience, performance, and developer velocity through innovative automation.*

Experience

Senior Software Engineer, Oracle (OCI)

Sep 2024 - Present

- Built multiple AI agents, MCP servers leveraging internal APIs to enhance admin toolings, increasing efficiency by 40%.
- Collaborated on a high-impact task force to engineer internal Claude workflows and memory banks, standardizing AI-assisted coding across the entire organization.
- Built an OCI AI Agent (LangChain) prototype to scan historical Jira tickets and suggest workarounds or SMEs for faster issue resolution.
- Led three major FusionApps projects from design to deployment, boosting customer engagement by 20% through enhanced user features.

Software Developer II, Oracle (OCI)

Jan 2022 - Sep 2024

- Delivered high-impact code deployments across key components including Key Management Service, and Disaster Recovery systems.
- Engineered and optimized a high-availability service utilizing Key management Service supporting 9000 peak TPS.
- Drove key infrastructure and **architectural decisions** for Fusion Applications, focusing on **security tradeoffs, compliance, and scaling** for high-availability systems, leveraging NoSQL databases.

Lead Software Engineer, Nextiles

Jan 2021 - Jan 2022

- Established the company's foundational AWS software pipeline, architecting CI/CD workflows and cloud infrastructure (S3, DynamoDB, CodePipeline) that continue to power core operations.
- Architected and implemented a **highly-available, event-driven pipeline** using **Apache Kafka** to **decouple** core microservices.
- Led a cross-functional team of engineers and data scientists to design and deploy the company's software infrastructure.

Software Development Engineer, Amazon Web Services

Jul 2020 - Dec 2020

- Contributed to control planes for a distributed service capable of handling billions of requests per month with low-latency response time.
- Led the design and onboarding of a new internal service onto AWS, enabling additional customer-facing features.
- Demonstrated proficiency in Python and Ruby to carry out various tasks related to continuous integration and deployment (CI/CD).

Associate Application Developer, ADP

Feb 2020 - Jul 2020

- Developed integral modules and implemented automated testing using Express.js/GraphQL backend and React front-end.
- Built several UI modules that utilize MongoDB databases and contributed to a microservices-based architecture.

Graduate Research Assistant, QUEST LAB

Nov 2018 - May 2019

- Built & deployed Mobile and web app, using React Native, also flask server which was later dockerized and deployed to Kubernetes.

Full Stack Developer, ReadyBytes Software Labs (India)

Jan 2017 - Dec 2017

- Maintained CMS software solutions for an e-service platform, in Android development and backend handling in Laravel framework

Education

Stevens Institute of Technology, Hoboken, NJ

Aug 2018 - May 2020

Master of Science in Computer Science (GPA- 3.8/4.0)

Key Courseworks: NLP, Advanced Programming in the Unix Env., Distributed Systems, Advanced Algorithms.

Rajasthan Technical University, INDIA

Aug 2013 - May 2017

Bachelor of Engineering in Information Technology

Coursework: Networking, Principles of Programming Language, Data Structures & Algorithms, Computer Networks

Technical Skills (Computer Science)

- Data & ML Tools: AI Agents, MCP servers, LangChain, LangGraph, Pandas, NumPy, Scikit-learn, Data cleaning
- Languages: Python, Java, JavaScript (ES6+), TypeScript, Kotlin
- Devops related tools: OCI, AWS, CI/CD, Maven, Git, Docker, Kubernetes, GCP, Firebase
- Frameworks & Libraries: NOSQL, Kafka, DynamoDB, Terraform, React, Express.js, React Native, GraphQL, Redis, MongoDB, Pytest
